

ASSEMBLY INSTRUCTIONS

Contents:

- 1.** Mount the wide strip in the upper groove, the narrow one underneath.

Cut to length if necessary.

2. Slide the feet into the lower grooves.

3. Place the roof rack so the feet grip around the rails.

Tighten the bolt until the roof rack cannot slide sideways (approx. 8 Nm).

4. Lock the outer cover.

NOTE! The first 2-3 times, it might be **very** difficult to turn the key. Press firmly inward and turn to the right.

5. Slide in the end caps. The hinge should be closest to the front of the car.

The outer part opens to access the upper groove.
